Summary of Experience

Earl Welton serves as a leader in the development of design solutions, production of construction documents, and development project specifications. Earl works with project teams comprehensively and excels in efforts involving field surveys, fact-finding investigations and system and product selections. Earl focuses on project code compliance, material selections and design aesthetics during design development and with the management of comprehensive project development within our office and with our project consultants during all phases of construction.

Prior to joining The Hezner Corporation Earl had worked in a variety of positions that have contributed to his broad knowledge base including:

- Project coordinator and estimator for a mechanical contractor. Projects included private and public works including power plants, processing plants, waste water treatment plans, churches, department stores, University laboratories, and hospitals as well as residential developments with projects ranging in value from \$10,000 to \$40,000,000+.
- Laborer for mechanical and site utility contractor on projects ranging from large processing plants to university laboratories.
- Facilities Management of a 10,000 square foot commercial fish hatchery that sold fish to various food markets in New York and Florida
- Site management for a large private estate which included maintaining the grounds, farm and lawn equipment as well as the construction and maintenance of multiple ponds including maintaining their respective fish populations.
