

Summary of Experience

Scott Hezner is part of the third generation that owns and manages The Hezner Corporation. He has been with the firm since 1989 and has worked in the Architectural / Construction industry since 1982. Over his 42 years of experience Scott has provided professional services on a broad spectrum of building types.

Scott's background includes experience in all aspects of architectural practice with emphasis on Master Planning, Programming, Schematic Design, Construction Documentation and Project / Firm Management. Since joining the firm in 1989, Scott has focused on enhancing the menu of services the firm offers, the quality of project delivery, and how to consistently build upon good will and client satisfaction through the ethical delivery of professional services.

Scott has extensive knowledge of municipal & city government procedures and guidelines, and always brings realistic procedural requirements and constraints into the planning and design process.

At the core of Scott's professional approach is his belief that the importance of a project's process is not dependent upon the magnitude or cost, but upon how important the result is to each client and the greater community the client functions within. Large or small, complex or simple, each project equally deserves the highest levels of consideration, effort and respect. This is the basis for executing consistent and successful professional services, and is the essence of professional architectural practice.
